Prolactin-Releasing Peptide (12-31) (PrRP-20) (human) ELISA

Prolactin Releasing Peptide is a hypothalamic peptide hormone that stimulates prolactin release, and regulates prolactin expression, by binding to prolactin releasing peptide receptor (GPR10). It has stimulatory effects on both luteinizing hormone and follicle stimulating hormone.

This ELISA was developed with serum from rabbits immunized with Prolactin-Releasing Peptide (12-31) coupled to a carrier protein.
