### 8.2 Exposure Controls

**Appropriate engineering controls:** Avoid contact with skin, eyes, and clothing. General industrial hygiene practice. Wash hands before breaks and immediately after handling the product.

**Personal protective equipment:** Avoid all unnecessary exposure by using the following equipment:

**Hand protection:** Handle with gloves, use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

**Eye protection:** Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).

**Skin and body protection:** Wear suitable protective clothing, such as a laboratory coat. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

**Respiratory protection:** Where risk assessment shows air-purifying respirators are appropriate, use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

**Other information:** Do not eat, drink, or smoke during use.

**Control of environmental exposure :** Prevent further leakage and spillage if safe to do so. Do not let product enter drains. Discharge into the environment should be avoided.
