## T-4045

### Rabbit anti $\beta$ -Endorphin (rat)

$\beta$ -Endorphin is a 31 amino acid endogenous opioid neuropeptide that is produced in certain neurons within both the central and the peripheral nervous system. It is known to be one of the three endorphins that are produced in humans, together with  $\alpha$ -Endorphin and  $\gamma$ -Endorphin, and it primarily acts in the body to reduce stress and maintain homeostasis.

This antibody was generated by immunization of rabbits with  $\beta$ -Endorphin coupled to a carrier protein.

#### TECHNICAL AND ANALYTICAL CHARACTERISTICS

<b>Lot number:</b>	A18PO2162
<b>Host species:</b>	Rabbit IgG
<b>Quantity:</b>	50 $\mu$ l
<b>Format:</b>	Neat undiluted antiserum, lyophilized, packaged under nitrogen. Reconstitute by adding 50 $\mu$ l distilled water. This will give the equivalent of undiluted antiserum.
<b>Stability:</b>	Original vial: at least one year at 4° - 8°C from date of delivery. Minimize repeated thawing and freezing of the antiserum by freezing aliquots at -20°C or below.
<b>Applications:</b>	This antibody has been tested and validated in ELISA against $\beta$ -Endorphin and in immunohistochemistry (IHC). Other applications like FACS or Western Blot may work as well. Optimal dilutions should be determined by the end user. Please see <a href="http://www.bma.ch">www.bma.ch</a> for protocols and general information.
<b>Immunogen:</b>	Synthetic peptide H-Tyr-Gly-Gly-Phe-Met-Thr-Ser-Glu-Lys-Ser-Gln-Thr-Pro-Leu-Val-Thr-Leu-Phe-Lys-Asn-Ala-Ile-Ile-Lys-Asn-Ala-Tyr-Lys-Lys-Gly-Glu-OH coupled to carrier protein.

Typical titration curve of  $\beta$ -Endorphin in a competitive ELISA with this antibody:

Related Products: S-1264: ELISA, extraction-free for rat serum and plasma samples  
 S-1170: ELISA, high sensitivity for extracted samples  
 T-4044: anti  $\beta$ -Endorphin (rt), purified IgG, host: rabbit
