Standard Diluent for use with Rat samples

A high-quality diluent formulated specifically for rat applications. Prepared from defibrinated, delipidated, and charcoal-stripped porcine serum to ensure reduced background interference and improved assay performance.

Preserved with 0.06% ProClin™ 150 for enhanced stability and protection against microbial contamination.

TECHNICAL AND ANALYTICAL CHARACTERISTICS

- Product number:** Y-1065
- Host species:** rat
- Quantity:** 9 ml
- Format:** Ready to use, e.g. in extraction-free ELISA kits for serum or plasma (EIAS type). No dilution required.
- Shelf-life:** One year from production date. Store at 4°C.
- Applications:** The Standard Diluent-H is used for standard dilutions as well as for dilutions of rat serum or plasma samples.

- Related Products:** Y-1060: Human serum as Standard Diluent for human samples
