

## T-4006 Rabbit anti Angiotensin II

Angiotensin II (Angiotensin 1-8) is a naturally occurring peptide hormone of the reninangiotensin-aldosterone system (RAAS). It consists of eight amino acids and causes vasoconstriction and an increase in blood pressure. Besides these immediate effects, it also enhances or modulates inflammation, endothelial dysfunction and atherosclerosis.

This antibody was generated by immunization of rabbits with Angiotensin II coupled to a carrier protein.

## TECHNICAL AND ANALYTICAL CHARACTERISTICS

Lot number: A16358

Host species: Rabbit IgG

Quantity: 50ml

**Format:** This polyclonal antibody is supplied as a lyophilized powder. The powder

should be rehydrated with 50ml of RIA buffer. Upon reconstitution to 50ml total volume, the solution contains 0.1M sodium phosphate buffer (pH 7.4), 0.05M NaCl, 0.1% BSA, 0.01% NaN $_3$ , and 0.1% Triton X-100. Store at 4° - 8°C. This should ensure antibody stability for approximately

one month.

**Stability:** Original vial: at least one year at 4° - 8°C from date of delivery. Minimize

repeated thawing and freezing of the antiserum by freezing aliquots at

-20°C or below.

**Applications:** This antibody has been tested and validated in ELISA against

Angiotensin II. Other applications like immunohistochemistry (IHC),

FACS or Western Blot may work as well.

Optimal dilutions should be determined by the end user.

Please see www.bma.ch for protocols and general information.

**Immunogen:** Synthetic peptide H-Asp-Arg-Val-Tyr-Ile-His-Pro-Phe-OH coupled to

carrier protein.

## **Cross-Reactivity:**

PEPTIDE	%
Angiotensin II	100
(Val <sup>5</sup> )-Angiotensin II	100
Angiotensin III	100
Angiotensin A	100
Renin Substrate	0.9
Angiotensin I	0.5
ANF (1-28) (human)	0
[Arg8]-Vasopressin	0
[Sar <sup>1</sup> , Ile <sup>8</sup> ] Angiotensin II	0

Cross-reactivity data is taken from radioimmunoassay and or enzyme immunoassay applications.
