

T-4141

Rabbit anti Amylin (cat) [UniProt: P12967]

Amylin (also known as islet amyloid polypeptide (IAPP) is a 37-amino acid peptide hormone with a disulfide bridge between cysteine residue 2 and 7. Both the amidated C-terminus and the disulfide bridge are necessary for the full biological activity of Amylin. It is co-secreted with insulin from the pancreatic β -cells and plays an important role in the glycemic control, regulating it by slowing gastric emptying and promoting satiety. It is also involved in bone metabolism, along with the related peptides calcitonin and calcitonin gene related peptide

This antibody was generated by immunization of rabbits with Amylin coupled to a carrier protein.

TECHNICAL AND ANALYTICAL CHARACTERISTICS

Lot number: A13604

Host species: Rabbit IgG

Quantity: 400µg

Format: Protein A affinity purified from antiserum, lyophilized, packaged under

nitrogen.

Reconstitute by adding 0.2ml distilled water. This stock solution contains 2mg/ml lgG, phosphate buffer saline pH 7.4 (PBS), and 0.02% (w/v)

Thimerosal as a preservative.

Stability: Original vial: at least one year at 4° - 8°C from date of delivery. Minimize

repeated thawing and freezing of the antiserum by freezing aliquots at -

20°C or below.

Applications: This antibody has been tested and validated in ELISA against Amylin.

Other applications like immunohistochemistry (IHC), FACS or Western Blot may work as well. Optimal dilutions should be determined by the

end user. Please see www.bma.ch for protocols and general

information.

Immunogen: Synthetic peptide H-Lys-Cys-Asn-Thr-Ala-Thr-Cys-Ala-Thr-Gln-Arg-Leu-

Ala-Asn-Phe-Leu-Val-Arg-Ser-Ser-Asn-Asn-Leu-Gly-Pro-Val-Leu-Pro-Pro-Thr-Asn-Val-Gly-Ser-Asn-Thr-Tyr-NH2, (Disulfide bond) coupled to

carrier protein.
