## T-4219

### Rabbit anti C-Type Natriuretic Peptide (1-29) (mouse, porcine, rat) [UniProt: Q61839, P55207, P18104]

Natriuretic peptide precursor C (NPPC) is a protein that in humans is encoded by the NPPC gene. The precursor NPPC protein is cleaved to the 22 amino acid peptide C-type natriuretic peptide (CNP). Natriuretic peptides comprise a family of 3 structurally related molecules: atrial natriuretic peptide (ANP), brain natriuretic peptide (BNP), and C-type natriuretic peptide (CNP). These peptides possess potent natriuretic, diuretic, and vasodilating activities and are implicated in body fluid homeostasis and blood pressure control. C-type natriuretic peptide (CNP) generates multiple protein products, include the cardiac natriuretic peptides CNP-53, CNP-29 and CNP-22.

This antibody was generated by immunization of rabbits with C-Type Natriuretic Peptide (1-29) coupled to a carrier protein.

#### TECHNICAL AND ANALYTICAL CHARACTERISTICS

<b>Lot number:</b>	A11199
<b>Host species:</b>	Rabbit IgG
<b>Quantity:</b>	50µl
<b>Format:</b>	Neat undiluted antiserum, lyophilized, packaged under nitrogen. Reconstitute by adding 50µl distilled water. This will give the equivalent of undiluted antiserum.
<b>Stability:</b>	Original vial: at least one year at 4° - 8°C from date of delivery. Minimize repeated thawing and freezing of the antiserum by freezing aliquots at -20°C or below.
<b>Applications:</b>	This antibody has been tested and validated in ELISA against C-Type Natriuretic Peptide (1-29). Other applications like immunohistochemistry (IHC), FACS or Western Blot may work as well. Optimal dilutions should be determined by the end user. Please see <a href="http://www.bma.ch">www.bma.ch</a> for protocols and general information.

Typical titration curve of purified anti CNP in a competitive ELISA with this antibody:

Procedure: antibody was applied to goat anti rabbit IgG-coated microtiter plate. tracer or tracer / antigen mixture was added, developed with streptavidin-HRPO and TMB as substrate for HRPO.

red curve: titration of antibody with CNP tracer (biotinylated peptide and streptavidin-HRPO); blue curve: inhibition of tracer by antigen, showing affinity of antibody for CNP and tracer.

Related Products:

- T-4221: anti CNP (32-53), diluted antiserum, host: rabbit
- T-4222: anti CNP (32-53), purified IgG, host: rabbit
- T-4223: anti CNP (32-53), neat antiserum, host: rabbit
- S-1512: ELISA, extraction-free for serum and plasma samples
- T-4218: anti CNP (29), purified IgG, host: rabbit
