Rabbit anti Met-Enkephalin

Met-enkephalin is a pentapeptide, sometimes referred to as opioid growth factor (OGF). It is a naturally occurring, endogenous opioid peptide that has opioid effects of a relatively short duration. It is one of the two forms of enkephalin, the other being leu-enkephalin. The enkephalins are considered to be the primary endogenous ligands of the δ -opioid receptor, due to their high potency and selectivity for the site over the other endogenous opioids. Met-enkephalin is found mainly in the adrenal medulla and throughout the central nervous system (CNS).

This antibody was generated by immunization of rabbits with Met-Enkephalin coupled to a carrier protein.

TECHNICAL AND ANALYTICAL CHARACTERISTICS

Lot number:	A13118
Host species:	Rabbit IgG
Quantity:	400 μ g
Format:	Protein A affinity purified from antiserum, lyophilized, packaged under nitrogen. Reconstitute by adding 0.2ml distilled water. This stock solution contains 2mg/ml IgG, phosphate buffer saline pH 7.4 (PBS), and 0.02% (w/v) Thimerosal as a preservative.
Stability:	Original vial: at least one year at 4° - 8°C from date of delivery. Minimize repeated thawing and freezing of the antiserum by freezing aliquots at -20°C or below.
Applications:	This antibody has been tested and validated in ELISA against Met-Enkephalin. Other applications like immunohistochemistry (IHC), FACS or Western Blot may work as well. Optimal dilutions should be determined by the end user. Please see www.bma.ch for protocols and general information.
Immunogen:	Synthetic peptide H-Try-Gly-Gly-Phe-Met-OH coupled to a carrier protein.

Cross-Reactivity:

PEPTIDE:	%:
Met-Enkephalin	100
Met-Enkephalin-Arg-Phe	.1
Leu-Enkephalin	3
Met-Enkephalin-Arg-Gly-Leu	0
Dynorphin A (1-17)	0
β -Endorphin (human)	0.1
ACTH (1-39) (human)	0
Endothelin-1 (human, bovine, dog, mouse, porcine, rat)	0
