Rabbit anti Salusin- α (human)

Salusins are expressed and synthesized ubiquitously within human, rat, and mouse tissues, including the vasculature, central nervous system, and kidneys. They are present in human plasma and urine, indicating their possible role as peptide hormones in humans. Salusin- α and Salusin- β are related peptides produced from prosalusin. Salusins may be potent hypotensive peptides. Particularly, Salusin- α and Salusin- β may be endocrine and/or paracrine factors able to increase intracellular calcium concentrations and induce cell mitogenesis.

This antibody was generated by immunization of rabbits with Salusin- α coupled to a carrier protein.

TECHNICAL AND ANALYTICAL CHARACTERISTICS

Lot number:	n/a
Host species:	Rabbit IgG
Quantity:	50 μ l
Format:	Neat undiluted antiserum, lyophilized, packaged under nitrogen. Reconstitute by adding 50 μ l distilled water. This will give the equivalent of undiluted antiserum.
Stability:	Original vial: at least one year at 4 ^o - 8 ^o C from date of delivery. Minimize repeated thawing and freezing of the antiserum by freezing aliquots at -20 ^o C or below.
Applications:	This antibody has been tested and validated in ELISA against Salusin- α . Other applications like immunohistochemistry (IHC), FACS or Western Blot may work as well. Optimal dilutions should be determined by the end user. Please see www.bma.ch for protocols and general information.
Immunogen:	Synthetic peptide H-Ser-Gly-Ala-Leu-Pro-Pro-Ala-Pro-Ala-Ala-Pro-Arg-Pro-Ala-Leu-Arg-Ala-Gln-Arg-Ala-Gly-Pro-Ala-Gly-Pro-Gly-Ala-Lys-NH ₂ coupled to a carrier protein.
Related Products:	S-1265: ELISA, high sensitivity for extracted samples T-4812: Rabbit antiSalusin- β (hu), purified IgG T-4811: Rabbit antiSalusin- β (hu), neat antiserum T-4794: Rabbit antiSalusin- α (hu), purified Igg

This product contains no preservative and is intended for laboratory use and research purposes only. Purchase of this product does not include authorization to use it in diagnostic or therapeutic applications.
