### Guinea pig anti $\alpha$ -Atrial Natriuretic Factor (1-28) (human, bovine, porcine) [UniProt: P01160, P07501, P24259]

Atrial Natriuretic Factor (ANF) is a 28 amino acid peptide hormone secreted mainly by the heart atria in response to atrial stretch. ANF acts on the kidney to increase sodium excretion and glomerular filtration rate (GFR), to antagonize renal vasoconstriction, and to inhibit renin secretion.

This antibody was generated by immunization of guinea pigs with Atrial Natriuretic Factor (1-28) coupled to a carrier protein.

<b>Lot number:</b>	A15546
<b>Host species:</b>	Guinea pig IgG
<b>Quantity:</b>	50 $\mu$ l
<b>Format:</b>	Neat undiluted antiserum, lyophilized, packaged under nitrogen. Reconstitute by adding 50 $\mu$ l distilled water. This will give the equivalent of undiluted antiserum.
<b>Stability:</b>	Original vial: at least one year at 4° - 8°C from date of delivery. Minimize repeated thawing and freezing of the antiserum by freezing aliquots at -20°C or below.
<b>Applications:</b>	This antibody has been tested and validated in ELISA against $\alpha$ -Atrial Natriuretic Factor. Other applications like immunohistochemistry (IHC), FACS or Western Blot may work as well. Optimal dilutions should be determined by the end user.
